Length : 76 cm

Height : 56 cm

Description

Sold unframed. Lithograph, signed, numbered VII/XXX, and inscribed to Jacques. Dimensions: 56 x 76 cm.Pierre Cordier (1933-2024)On November 10, 1956, Pierre Cordier--a lover of art and photography--invented a technique that combines the physics of painting (varnish, wax, oil) and the chemistry of photography (photosensitive emulsion, developer, fixer)--without a camera or enlarger, in broad daylight. In 1958, after a four-month internship at Otto Steinert's school in Saarbrücken, he named his technique and the resulting image "chemigram."Since 1965, he has taught at ENSAV, the National Higher School of Visual Arts of La Cambre in Brussels.In 1988, he exhibited at the Museum of Modern Art in Brussels, created a monumental work in the

Brussels metro, and became a member of the Royal Academy of Belgium, in the fine arts class, painting and printmaking section.The significance of the invention of the chemigram has been recognized at conferences and in numerous solo and group exhibitions, both in Europe and in the United States and Japan. Among the most recent was the "Homage to Jorge Luis Borges" exhibition at the Rencontres Internationales de la Photographie d'Arles in 1996
