Description

Vintage Educational Anatomical Model dating back to 1981, made in the USSR and used in schools at the time as a visual aid for the study of comparative anatomy and mammalian evolution.
A rare and perfectly preserved object capable of telling the story of Soviet science and education.
Three specimens showing the evolutionary adaptation of the forelimb in mammals, highlighting three different functions:
Rat - limb adapted for locomotion
Mole - limb adapted for digging
Bat - limb modified into a wing for flight
Housed in its original box, with printed texts in Russian.
Provenance: Ukraine
Dating: 1981
