LE PLUS BEAU CATALOGUE D'ANTIQUITES

Unique Optical Construction

325 EUR

Period : 20th century

Condition : Parfait état

Material : Other

Description

A mad scientist, whose name I don't know, once had the idea of enclosing a small, diaphanous butterfly, of extreme delicacy, in a steel and glass straitjacket. The magic lantern condenser does its job, because the brilliant inventor reversed the lenses to obtain a fabulous magnifying glass effect. Enclosed forever in its glass torpedo, the butterfly reveals all its charms provided that the lighting helps it. A unique piece in the world... I like it.
