Ring Made Of Ebony, Gold, Silver, And An Akoya Pearl - Contemporary Design Ring

600 EUR

Period : 20th century

Condition : Très bon état

Material : Solid wood

Description

This sculptural ring boldly combines precious and organic materials. The ebony band forms a soft, enveloping line, highlighting the depth of its intense black.The design is accentuated by a structure blending yellow gold and silver, which delicately accentuates the ring's curve. At its top, an Akoya pearl reveals subtle pearlescent highlights, bringing light and elegance to the entire piece.The contrast between the warmth of the wood, the brilliance of the metals, and the softness of the pearl creates a decidedly contemporary piece that is both graphic and refined.DetailsMaterials: Ebony, 750-th yellow gold (18 k), and silverStone: Akoya cultured pearlDesign: Sculptural and contemporary shapeStyle: Modern / designCondition: Very good conditionRing size: 54--cannot be
