Description

This ring, crafted from 750-th yellow gold and platinum, captivates with its delicate elegance and exquisitely fine openwork design. At its center, a modern-cut diamond intensely captures the light, offering a vivid and brilliant sparkle.It is surrounded by a finely chiseled diamond-shaped motif, featuring an openwork design inspired by botanical and ornamental motifs. Rose-cut diamonds punctuate the setting, adding a softer, more subtle sparkle characteristic of antique cuts, creating a harmonious contrast with the brilliance of the center diamond.The band, also crafted with delicate details, extends this refined aesthetic, typical of early 20th-century jewelry.DetailsMaterial: platinum and 750-th (18k) yellow goldCenter stone: Modern-cut diamondSide stones: Rose-cut diamondsWork:
