Description

An important, large ancient capital, attributable to the medieval sculptural tradition of Upper Lazio, particularly the Viterbo area.Carved from peperino, a volcanic stone characteristic of the region, the capital features refined carvings of stylized plant motifs and volutes.The upper band is embellished with a series of diamond-shaped points, an ornamental motif typical of medieval architectural decorations in Viterbo.Its impressive dimensions give the artifact a monumental presence, making it an architectural element of particular historical, artistic, and collectible interest.
