### Description

Rare drawing from the Revolutionary period representing Constance VÃ©ry de la Pierre (1776-1848) by Jean Antoine Marie Lemoine (1751-1824). Daughter of the future administrator of the imperial customs she marries Louis LÃ©ozurier of Martel future mayor of Rouen then of Hautot sur Seine. Remarkable designer she is the student of the painter Rouennais Lemoine author of our drawing and represents it here in bust and profile. Lemoine is known as a portraitist and inventor of a perspective easel and a machine "to ensure the likeness in the portrait". He executed this beautiful drawing in 1791. Annotations on the back, located and dated on the Marie Louise. Kept in the family. A small paper restoration at the top right. Louvre Museum, Rouen and Revolutionary Museum. See: portrait
