Material : Argent massif

Height : 12,5 cm

<https://www.proantic.comdisplay.php?id=637552>

Description

Covered broth and its silver display decorated with gadroons on the edges. The bouillon has two side handles with leafy appliques. The lid has a large oval shape; the latter is surmounted by a fretel made in the shape of a pine cone on a corolla of leaves. The body is engraved with a discreet numbered medallion, the upper part of which was certainly erased during the revolutionary period.

Each part of the set is perfectly stamped.

Parisian work around 1789
