

Stereoscopic Viewer, Brewster, Stereoscope

Description

Trapezoidal "Brewster" stereoscopic viewer with curved edges in precious Amboina briar. Around 1860.

The stereoscope is suitable for viewing stereoscopic paper and glass plates measuring 13x18.

The lenses are in excellent condition and the viewer works perfectly. At the front, two adjustable converging lens eyepieces with rack and pinion mechanism. On the opposite side of the lenses is a frosted glass plate for diffusing light to view the glass plates, above it a mirror to reflect light for illumination of the cardboard plates.
