Description

Pair of planters, "elephant's ear" model in fibro cement made by Willy Guhl (1915-2004) in the 1950s

Willy Guhl is the pioneer of Swiss industrial design.

Eternit, a fiber cement developed for the manufacture of roofs and pipes, interests Willy Guhl for its fibrous texture resistant to traction, breakage and climatic variations. According to him, "no building material used so thinly gives as much stability as Eternit. "
