

Gold Agate Earrings With Dendrite And Hematite

3 400 EUR

Period : 20th century

Condition : Neuf

Material : Gold

Description

For pierced ears. Ear pendants made of a pair of agate with oval-shaped dendrites, held in a tassel by a closed setting, adorned with a faceted oval hematite. The fastening system is a nail with safety clasp. Main material: yellow gold, 750 thousandths, 18 carats. Total weight of the agates: approximately 21.85 carats. Proportions: Height: 4.4 cm, width: 1.8 cm, thickness of the mobile part: 2.3 mm, thickness of the fixed part: 3.7 mm. Net weight: 9.4mm. Our opinion: This pairing of agate with dendrite is fabulous. It looks like a coral massif on a translucent white and brown background. Unique pieces! To find out more Discover the product sheet of these Gold Agate Earrings with Dendrite And Hematite online.
