Light usual scratches on lugs and case (never
polished)
but remains in really good overall condition
More important: in its original condition (strap
excepted)

History of maintenance is unknown but the watch
is of course in perfect working order and keeps
very good time...

History:

In 1956 a team of Swiss Mountaineers and
Sherpas ascended Mount Everest, on their wrist
the Enicar Seapearl. Capitalising on the media
attention surrounding this ascent, Enicar added
the Sherpa moniker to their watches.

The Sherpa series quickly met a real success so
that Enicar proposed « Sherpa » watches in more
than fifty variations.

This Super Dive, one of the first Sherpa models, is
very researched for its design and its large dial.
Prices increase since few years already.
