

Geometric Map Of The Province Of Brittany - 1771 By Jbogée

1 250 EUR

Period : 18th century

Condition : Bon état

Description

Important map of Brittany made by the engineer geographer Jean-Baptiste Ogée (1728-1789) and engraved by Nion in 1771.

It was on a copy of this map that the Breton deputies, on February 26, 1790, delimited and approved the creation of the five new departments.

Formerly intended to be folded, this map has been cut and then interfaced in order to give it a transportable format that can be used anywhere.

Framed copy, presented in one piece, and fixed on a rigid support by small nails through the cloth and not the paper.
