Description

Spectacular watch holder with gilt bronze base with finely chiseled plant decoration of water lilies which supports two large iridescent mother-of-pearl shells which open and reveal a pompom watch holder. On either side a small candlestick in the shape of a flower intended for the installation of candles. It measures 35 cm high by 29 cm wide and 16 cm deep (base) for a weight of 1,200 kg. This is a French work from the Napoleon III period. A very beautiful unusual object, both useful and very decorative. Very beautiful carving of the base and iridescence of the mother-of-pearl. Very good state. Minor marks of age. It has been cleaned and therefore ready to be installed in your Napoleon III universe. Personal delivery only. Many other objects to discover in my stand at the antique fairs
