### Description

I offer you this interesting fetish statue from Tanzania. It was collected in Burundi , then bought by another collector and I acquired it by inheritance. Plastically very interesting, she is like an insect, with her long slender legs, her arms joined in prayer, her long and protruding penis, her haggard gaze as if in a trance... Beautiful brown patina of use, a large reliquary hole on the the skull clogged with wax or shellac. Height 47 cm and 60 cm with the base that will be provided.
