Description

Large panoramic gouache from the 1st third of the 19th century, depicting a landscape animated The composition of this panoramic work fully executed in gouache, remains extremely under control, both in its realization in the subtlety of its very bright and sometimes velvety colors. The details are very mature, both in the foreground than in the bottom of the composition.La sensation of transparency in the water is relatively well treated and rendered perfectly preserved thanks to the excellent state of conservation of surface gum arabic and others. Excellent condition and no restoration. Empire period setting. Ft part: 108 X 76.5 Ft sight: 91,5X 60
