Description

We present for sale this pleasant religious sculpture in wood treated in a mannerist way, I would even say baroque. It represents a Holy person who could be Mary Magdalene, I do not certify it but I will deepen the question after the fact and then if necessary I will make a correction. It is designed in resinous wood, in any case in soft wood, it could be linden which would have taken on a slightly golden patina over time. It measures 40 cm overall, the base is also magnificent.
