Adjustable Architect's Chair In Chromed Metal - 1960s

750 EUR

Period : 20th century

Condition : Parfait état

Material : Metal

Width : 34

Height : 81

Depth : 37

Description

Architect's chair dating from 1960, with a chromed metal structure, and a discreet and slender look. Its plywood seat is molded in a bowl and equipped with a lever placed below, allowing the height to be adjusted. It will also be noted that this seat is rotating. This chair consists of a main central shaft, cylindrical, in chromed metal, into which a second is inserted. The whole rests on a base with five legs arranged in a star, each of them resting on a circular pad. The backrest is in slightly curved plywood. It is also adjustable on the metal blade on which it is fixed. The judicious vintage / industrial look combined with an ergonomic design will make this architect's chair an essential suitable for professionals and individuals alike. ******** Period: 1960. Excellent working condition.
