Description

"Amours au dauphin" terracotta fountain. Sculpted in the rond de bosse style, this terracotta fountain features 2 loves and a stylized dolphin, supported by a simulated rock base. The two curly-haired putti master an antique-style dolphin. Water can gush from the open mouth of the cetacean. Richly ornamented and with a magnificent patina, this terracotta sculpture reflects the sculptural vocabulary of the 18th century. The terracotta is 92 cm high. The base is a round walnut column, 86 cm high. Ref : A5913 / A5914
