Description

EXCLUSIVE!!! This industrial cart, made entirely of steel, was used to move boat engines in a Renault Marine factory. It has been completely cleaned, the upper plate has been sanded then varnished in order to freeze the beautiful black color and its imperfections. The structure sports a beautiful pale yellow color and some remnants of the previous color and marks from a lifetime of service. The lower part has been replaced by a beautiful solid oak top, in order to bring a contrast and a touch of naturalness. It is placed on 4 casters, two fixed and two which swivel 360 degrees so that it can be easily directed. They have been thoroughly cleaned and the bearings greased. It can move without problem despite the substantial weight, witness to its good quality of manufacture. This
