Height : avec encadrement 124cm

Depth : à l'encadrement 5,5cm

Description

Interesting suite of three windows composed of stained glass, complete with their frames and opening systems by cremones, manufacture of the middle of the 20th century. These arched windows are of very good quality, the green, yellow and orange stained glass windows were made of irregular-looking glass, thus giving an older and authentic appearance to the whole. Decor in braces. They are all sold with their frames and their locking systems with espagnolette, the handles are in gilded bronze. The whole is in good condition, the paint is old and chipped on the woodwork. Note, two tiny hairs on the end of two small squares, not requiring to be replaced because not presenting any fragility (see last photo) and without any impact on the visual of the whole. Width with
