Description

Discover these vintage chairs from the 60s, real treasures unearthed in Denmark, in the charming city of Odense. Their retro and Scandinavian style makes them unique pieces with an authentic character. These chairs are in teak and the black leatherette brings a touch of elegance and modernity, creating a harmonious contrast with the wood. In our workshop, we have taken care to thoroughly clean these chairs, thus preserving their period charm while giving them a second youth. A few marks of time, visible in the photos, testify to their experience and add a note of authenticity. With practical dimensions (H77cm x W50cm x D44cm) and a seat height of 44cm, these chairs are ideal for everyday use around a table or as extra seats in any room of your interior. Treat yourself to a piece of history with
