Description

Beautiful and rare pair of opaline vases decorated with birds on an apple tree branch, by BACCARAT. Really a beautiful set with 2 finely enameled vases decorated with birds on an apple tree. Note the vivid and many colors with this ochre background and these white apple blossoms all in contrast. We also recognize this "moon" or medallion, typical of the production of the illustrious crystal factory (model clearly referenced, see last photos). The finesse does not deceive. Beautiful ovoid shape on a small heel, each vase bears the Number 11 under the base. Height: 26.5 cm, very good condition. Rare old pair, clearly referenced, very beautiful colors, collectible.
