Description

Ring in 18 kt yellow gold (eagle's head hallmark), adorned in its center with a beautiful emerald in an oval cabochon cut, set closed in the center of a large oval with a soft and balanced aesthetic. On both sides, this oval aesthetic is taken up by fine arches set with lines of diamonds, in the center of which a domed ring body is inserted and finalizes the soft aesthetic all in curves of the whole of this ring. The particularly beautiful emerald with its 8.10 carats comes from Colombia, which is attested by a certificate from the Labo Gem Paris laboratory accompanying the ring. It offers the characteristics of a beautiful stone, a characteristic garden visible by transparency effect on the photos but not very visible when worn on the finger, a beautiful crystallization, and a sustained color (however difficult to reproduce

in a photo - this ring deserves be appreciated visually, within our shop). The codes of classic jewelry, through the combination of a colored gemstone (emerald) and diamonds, come together in a ring with a sober and timeless aesthetic. The effect of roundness and general oval created both by the cabochon and by its setting gives this ring of very beautiful volume a touch and a very soft wear. Emerald weight estimated at 8.10 ct Total diamond weight estimated at approx. 0.24 ct Gross weight: 18.58 g Ring size: 50 - can be modified to your liking by our workshop, updated size offered (current diameter 1,60 cm / US size .....) Condition: imperceptible micro scratches on the body of the ring, natural inclusions in the emerald, imperceptible lack of damage (see photos) and inclusions natural in diamonds not visible to the naked eye.
