## Description

Hand tufted rug. Hand-Tufted. Twentieth century

What is the Hand Tufted rug?
Supple, soft and perfectly suited to contemporary designs, the Hand Tufted rug, also called Hand Tuft or Asian Point, has become a reference in the world of designer rugs.

This technique offers the upholsterer a great freedom of manufacture. Tufting is a process using artisanal manufacturing methods, ancestral know-how mainly developed in India and China, and modern weaving tools.
The weaving is done by hand, the craftsman implanting the strands of textile, directly in a cotton canvas, a canvas stretched on a vertical loom. The tufting is carried out using a strand gun

following the colors, the design and the different heights of the wicks of the product.

The tufting technique makes it possible to produce high quality products and to afford all the eccentricities! Shapes, colors, designs, relief, everything is possible with an exceptional rendering. It is, for example, possible to sculpt carpets, the fiber is then implanted at maximum height of relief and then sculpted using scissors and razors. This method is also called "Carving". Carved carpets are truly exceptional pieces and are highly prized for their particularly luxurious finished appearance.

Timeless rug with embossed polychrome floral decoration.
Bright colors interacting with each other. The wool used is a synthetic acrylic wool, robust and soft.

Store price: EUR1500
