Material : Terracotta

Description

FLAT ROOF TILES - XVII, XVIII and XIX th Century

Terracotta Roof Tiles have been used for several millennia. Whether they are flat or round, Roman type or so-called Roman tiles, if they are laid traditionally. They will ensure a reliable and solid cover ready to ensure the resistance of a roof for several centuries if it is maintained as it should be. Easy to install, you will get a cover full of charm and authenticity. Forget modern tiles programmed to last 50 to 80 years maximum - except for some, but very unattractive.

Flat Roof Tiles are the most sought after. 2 sizes are still easily found: 17cm x 27cm or 14cm x 24cm - depending on regional sources.

The red range is the most resistant, the clay is denser.
