33, Rue de l'Orangerie Versailles 78000 Monday, November 26, 1860, printed at part, 4 p., Paris, impr. Mallet-Bachelor. Engravings in the text. In-4°, modern bradel half red shagreen binding. Ex-libris of doctor Paul Lorain, friend of Marey. Extremely rare copy of the doctoral thesis defended in 1859 by the doctor Etienne-Jules Marey, future inventor of the technique of cinema. When it came out, the physiologist Donders rightly proclaimed that this thesis was "the revelation of a real star". Marey's very first research, presented here, will allow him to develop his first device, the sphygmograph. Beautiful condition.
