Height : 61 cm

## Description

I did something that is not really allowed in the Proantic regulations and I'll explain: the vase that I'm putting up for sale was restored on the part of the neck, in fact I scraped all the parts that had been repainted and I realized that there was not as much damage as one might imagine. We have taken all the details of the parts which were affected by the shock that this vase may have had. This vase is very interesting due to its size, its quality, and its age and that is why now everything is visible and we are putting it back on sale. (E23) Ref. ..... SB 511
