## Wooden Cane Knob From Saint Lucia XVIIth

550 EUR

Period : 17th century

Condition : Bon état

Material : Solid wood

### Description

Spectacular wooden cane pommel from Saint Lucia, 17th or 18th century. In an animated shape, sculpted all around: a flower woman stripped in a stole, an infant lying protected in a cave, a protective lion, a man's bust emerging on the side. Once closed, the fist only reveals the woman's bust, the overall uneven shape allows very stable hand support for a right-handed person. Dimensions approximately 8 cm x 6.5 cm / height 8 cm Total height with base 17.5 cm > Fine break on the bust of the young woman, an imperceptible difference in color in the wood suggests a small area of less than a centimeter filled in at the back is very well done. Price nonnegotiable. Payment by check or bank transfer. Registered Colissimo shipping or Mondial Relay France free, other countries
