Height : 37,5 cm

| Description |
|-------------|
|-------------|

With a very architectural transparency, this large coffee table, dating from the 80s, has two clear glass tops supported by four perspex legs (altuglass, lucite, etc.). Large square upper tray (100 x 100 cm), in chamfered glass, widely beveled, and with rounded corners. The 4 feet fit onto the slightly rounded lower plate through very fitted slots, which allows them to be placed wherever you want, and of course to dismantle and reassemble the whole thing easily, without loss of stability. Very good general condition; a chip should be noted under the edge of the lower tray (2-3 cm), see the last photos. Length x width = 100 x 100 cm, height = 37.5 cm
