Description

Magnificent vase of neoclassical shape, in opaline, pigeon throat color. Charles X period Mercury gilding and finely chiseled bronze. Note: sold as is, the bronzes are not cleaned. Drilled for electricity. The previous owner had kept the two bronze elements at the top, before changing the screw thread to allow the electrical wire to pass inside the tube. Notice to collectors, absolutely sublime! (the two elements at the top are not fixed, but we have them, and we will give them to the final buyer.) It can therefore already be used as a lamp, it would simply be necessary to extend the electric wire and put a nice hat. Height 48 L 11.5
