Pieter and David MORTIER were brothers of French origin whose publications covered a vast area encompassing French and English as well as Dutch works. Pieter was probably trained in selling books and maps in Paris and David spent many years in England; in fact, he acquired British citizenship and died around 1728 or so. After Pieter's death, his widow continued his activities until their son, Cornelis, was able to take over. Then, in 1721, Cornelis joined forces with his brother-in-law, Johannes Covens, to form the famous Covens and Mortier, a company that retained a slight name change until the mid-19th century. Guillaume DELISLE (1675 - 1726) Son of Claude Delisle, Guillaume Delisle was a student of Jean Dominique Cassini. Student astronomer at the Academy of Sciences in 1702, he became a member in 1718; taught geography to the young King Louis XV and was appointed the King's first geographer. He produced more than 100 maps that he edited himself.
