Depth : 2,4 centimètres

### Description

A hollow cup in molten bronze With partitioning on both sides Between the brass wires of colored enamels The interior decor is rich full of details With a dragon in many colors The back is simpler but with a flower motif With a turquoise color ... The strapping of the foot and that of the rim is in gilded bronze... It is to my taste a cloisonné which changes from all these pieces with the same technique... It is thick, heavy, of very good quality. also changes because often it is on brass that cloisonné objects are made... CHINESE provenance In perfect condition From the 1930s Weight...461 gr
