### Description

Pair of alabaster baluster vases with carved decoration of bouquets of flowers, foliage and palmettes. Openwork collars and Greek-style handles. Late 19th century These vases are mounted as lamps and the electricity has been redone to standards. Very decorative and in pair, beautiful subdued light passing through the stone. Very good state. Height 41cm Price EUR600

What we think of it: a pair with the particularity of having the lamp inside the vases, which gives it a beautiful soft light. Did you know ? : Used since Antiquity mainly in Egypt, alabaster is a stone composed in particular of calcium. Its transparent appearance makes it unique and its success, particularly in the world of art. There are two kinds of alabaster: calcareous alabaster, composed of calcium carbonate, and alabaster
