Vegetable Paths With Sandstone Slabs

170 EUR

Period : 17th century

Condition : Etat d'usage

Material : Sandstone

Length : opus romain

Depth : epaisseur : 8/10 cm à 15/20 cm

Description

Vosges sandstone paving

Period 16, 17 and 18th century

Frost-resistant, this paving is ideal for dressing your garden paths

as found in English gardens.

Sold in full thickness, between 10 and 20 cm thick,

you must plan to remove your paths to install it on a sand base mixed with lime.

Layout in Roman opus, or in strip.

It can be made into steps between the different levels of your park or garden.

Mixed in gray, ocher and purple, the original shades can be mixed
or choose only one shade or the other - see our

Stock of +/- 300 m2

Attention ! This stone weighs between 200 and 300 kg per m2 in +/- 12/18 cm thick

Unlike much Burgundian limestone, sandstone does not freeze and moss clings to it easily over time.

Which is the most beautiful effect for country settings.

At your complete disposal to consider with you all its possible implications.
