## Description

Refined Italian mid-century mirror with wavy outer edge.The lower mirror glass was partially roughened before it was silvered, creating a matt and shiny decor with highs and lows in an abstract formation.This design looks almost naturalistic, almost like leaves but then again not, in any case very interesting.The straight-lined interior mirror with rounded corners isand completely fulfills its function, the edges are slightly chamfered. There is a gap of approx. 1 cm between the lower and upper mirror glass, which gives the object a depth effect and even more presence.Dimensions of the inside mirror: 51.0 x 51.0cmThere is no glass damage such as chipping etc.
