Description

Very large, iconic and timeless rectangular cushion from the 1990s by Versace. Gianni Versace was one of the first designers in the world to understand the importance of creating a Couture and fashion house representing a true lifestyle. Since then, Versace has become synonymous not only with fashion, but also with an art of living. On each side of the cushion is represented a vase covered with a drape having a lion for a handle. Everything is surrounded by a sky in the form of a frieze evoking the painted ceilings of the 17th century. He thus chooses to refer to Greece and ancient Rome. Made of cotton and polyester, double-sided, this very decorative fringed cushion is decorated with a unique print. Each side has its colors. There are therefore two colors: a blue colored side and a yellow colored
