Impressive Black Stained Turned Wood Microscope. From The 18th Century

11 500 EUR

Period : 18th century

Condition : Bon état

Material : Solid wood

Height : 47 cm

Description

Impressive black stained turned wood microscope.
The body has an elegant shape with a series of concentric rings of reduced sizes in both directions from a central cylindrical part covered with brown leather bearing a worked gold frieze.
On the lens the top cover also has a rounded shape.
The development is obtained by screwing (endless screw) with locking system inside the side upright itself mounted on the beveled hexagonal base.
Literature: at this stage, we could only refer to a similar model presented in the "Kölnisches Sadtmuseum" in Cologne, called "Germany XVIIIth century".
Dimensions: height of 47 cm, base: length of 21.5
