

"18 Ct Yellow Gold Earrings With 0.32 Ct Diamonds."

1 800 EUR

Period : 20th century

Condition : Parfait état

Material : Gold

Description

Type of metal: 18 carat yellow gold. The designation "18 carat" means that the alloy is 75% pure gold, mixed with other metals to strengthen and stabilize the material. Type of stone: Diamonds. There are two diamonds set in each earring. Total diamond weight: 0.32 carats. Each diamond weighs 0.16 carats, and the sum of the two gives the total weight of 0.32 carats. Setting: The way the diamonds are set on the earring may vary. It can be a claw setting, a closed setting, a pavé setting, etc. The type of setting can influence the aesthetics and security of diamonds.
