REVOLUTIONIZED FRENCH PAINTING OF

THE 1940S. Colorist and theoretician, the artist is present in numerous museums in France (Paris, Nantes, Dijon, Grenoble), abroad (Brussels, Stuttgart, New York, Toronto, Munich, Copenhagen...) he is one of the masters of painting. His work, one of the most fabulous of the 20th century, nevertheless remains underestimated. Charles Lopicque's work is strong, varied, original and daring. The painter opens up to the world by knowing how to perfectly combine his artistic concerns and his scientific observations, the artist, through his need to move forward, paints to understand. An unwitting precursor, Charles Lopicque is a genius of invention, a unique artist of his kind. This innovator analyzes and reconstructs reality with great imagination and fantasy. An exceptional painter, Charles Lopicque addressed a multitude of subjects (tigers, music, tennis players, horse races, regattas, naval maneuvers, Rome, Venice, etc.) with a technique that was both abstract and figurative. The supports and techniques are numerous (oil, gouache, acrylic, Indian ink, drawings, etc.). Charles Lopicque, through his pictorial and scientific research, was able to give a new role to color in painting.
