Depth : 21 cm (hors globe)

### Description

Milking scene in carved wood (walnut), animated by four characters and animals: a woman in costume with a headdress (appearing to be Dutch) who milks a cow, a beggar with a violin on her back and two children drinking milk ; they are accompanied by a cat and a dog facing each other around a bucket, a hen and a rooster in a decoration of singular plants.

Each subject is carved separately and the whole is assembled on a solid wood base.

This work is remarkable for its quality, its fantasy, particularly the expression of the faces with horned eyes.

This rural scene must probably evoke a moment in the life of the author or its recipient, in the spirit of the ex-votos.

This set rests on a blackened wooden base
