Description

Cage pendulum in bronze and sea green marble topped with an Eagle in gilded bronze. Opens 2 doors in bronze and glass to either set the time or reach the movement. Mercury pendulum. Second Empire style. Work at the end of the 19th century. Approximately 7.4 kg The clock is not blocked, rings but stops, so it needs to be serviced. We also note and see that the eagle needs to be reattached to its terrace (old fall, small gaps on the corners of the terrace)
