

## Bat Skeleton Osteology Deyrolle Paris

### Description

It is impossible to imagine the work that was necessary to be able to present such a meticulous skeleton, placed in a glass case. Object which comes from the famous house Deyrolle in Paris and which is no longer included in their list for sale. On the other hand, I found traces of a sale at Bergé, for which I won't tell you the amount of the bids, just mind-blowing. And to think that with such teeth, this little mammal only misses fruit. She responds to the sweet name of Nycteris Javanica Black frame, in perfect condition, ... hey, children, have you seen her fingers?
