

Forest Of 19th Century Ophthalmoscopes

465 EUR

Period : 19th century

Condition : Très bon état

Material : Other

Description

A forest of ophthalmoscopes casually placed in a dedicated space is great, especially for playing with lights... Handles made of whalebone, ebonite, bone, metal and then lots of little auscultation mirrors, full of diopters, plenty to play doctor, my grandson enjoys it. Collection of instruments from the 19th, even early 20th century, in batches...
