

Napoleon III Planter / Centerpiece

295 EUR

Period : 19th century

Condition : Bon état

Material : Silver metal

Description

Charming planter / centerpiece in silver metal with blue glass. A pretty openwork decoration of flowers, the feet in lion paws. In the four corners a woman's mask. Dimensions excluding handles 21 x 14 x 10.5 cm Weight with glass: 1 kg 433 A very beautiful, very decorative object, good condition but I would point out small wear to the silvering, this remains minimal. The blue glass has small chips on the lace but it has the advantage of being present because very often these glasses are missing because they have broken over time.
