Description

Sumptuous and impressive series of three jardinières or centerpieces in solid silver and blue crystal. They are designed like centerpieces attached to their presentation dishes . As is customary with the Keller silversmiths , the silver frames are exceptionally heavy: almost six kilos of first alloy silver for all. The royal blue crystal interiors are in mint condition. Supplier to several royal courts at the end of the 19th century, the Kellers deliver with this set a formidable example of the grandeur of tables at the end of the 19th century.
