

29,5cm High, Very Large Flanders Bronze Candlestick Late 15th Century

2 500 EUR

Signature : Ateliers flamands

Period : Before 16th century

Condition : Bon état

Material : Bronze

Diameter : 17cm

Height : 29,5cm

Description

Haute Epoque Flanders XVe s Very large cast and turned brass / bronze candlestick or torch (height 29.5cm), composed of a large circular base (diameter 17cm) with an oblique rim, and raised in the hollow with a simple line, raising the candlestick from the table where it was placed. The turned barrel has several rings or rings (6) and balusters (2). The barrel opens right through to 2 rectangular lights, for extracting the melted wax. Very beautiful large model! Good condition, the junction of the base and the barrel is original, and very nice general patina (not polished!). Note a micro slot of a few mm on the edge raising the base (please check last photo). Dimensions 29,5 cm height and 17cm diameter
