### Description

This work of art by master potter Mori Taiga shows his mastery of materials and the art of fire. We can imagine a libatory cup to celebrate a divinity, or more prosaically a basin to cool off on a summer night. It is also an invitation to touch as the artist explained to us: each touch of our hands on the pottery will give more beauty to its color and it will be more and more pleasant to the touch and we will have the pleasure to see the charm of this work increase. Circa: 2023.
