Description

Italian mid-century resin bowl in brown-gold tones Firenze 1980s

An artistic object that lies there like a flower, quite naturally it spreads its beauty.

The slightly oval shape with a wide rim stands on an off-center base.

The bowl on the base has a slightly ascending tenence height 8-11 cm

The brown-ochre-copper-gold tones flow into each other and give the object a unique appearance.

On any table a feast for the eyes.
