Description

Victorian compass pendant in 9 karat gold (375).
A very original compass-shaped pendant that can be rotated on itself, allowing it to be placed on the table to find North. Inside, an arrow rotates on the cardinal points. The compass is two-sided, with both sides protected by glass. It is decorated with a gold cord that holds the hoop. The North indication works. Made in England, Birmingham, 1891. Clover hallmark, Marks: Marine anchor (Birmingham), R for 1891, MW. Dimensions: 32 x 20 mm Diameter: 20 mm Condition: dust inside the compass, slight dents, wear light scratches on gold and glass. Weight: 5.26 gr Learn more: How does a compass work? A moving needle inside the compass reacts to a magnet, the Earth. Indeed, as our planet contains a lot of iron, it is magnetic, and the small moving needle inside the compass

uses this to indicate the north-south direction. However, this only works if there are no other magnets near the compass. Note that the needle of a magnetic steel compass always points approximately north.*The antique box is not sold with the jewel*See our antique chainsInternational Buyers: Please be aware of your country's customs fees.
